

DPD 2533-62
16 April 1962

MEMORANDUM FOR: Assistant Chief, DPD-DD/P
SUBJECT : Single Sideband in A-12
REFERENCE : OXC 3358

The effects of the limitations in frequency range of the SSB in the A-12 to the 12 through 30 megacycle band cannot be evaluated at this time. Until the operational procedure is determined and the location of the SAC base with the SSB station is determined, propagation studies cannot be conducted. Whether frequencies below 12 megacycles are required must be determined after the propagation study.
